

El Nino Seeks Joint Venture Partner for Zinc-Lead Exploration Properties in Bathurst Mining Camp, New Brunswick

- 2072 exploration claim units in proven, highly prospective zinc-lead VMS mining camp
- Seven base metal occurrence targets with historic resources estimates
- State-of-the-Art technical database, including 2013 Fugro airborne gravity dataset
- >100 DIAGNOS CARDS Targets
- Indicative \$8 million program proposed to explore mineralized occurrences and other targets

September 23, 2014, Vancouver, BC; El Nino Ventures Inc. (“ELN” and the “Company”) (TSX.V: ELN; OTC Pink: ELNOF Frankfurt: E7Q) is pleased to provide an update on its Bathurst Joint Venture Project (“Joint Venture”). The Joint Venture is a 50%:50% joint venture between ELN and Glencore Canada Corporation (GCC) in the prolific Bathurst Mining Camp of New Brunswick, Canada. The Joint Venture seeks a 3rd party partner to explore and develop its properties and, in addition, properties in the Bathurst Camp owned 100% by GCC. In return for funding 100% of a major, multi-year exploration budget, the partner would earn-in to a 50% equity position in the Joint Venture and the GCC 100% owned land. Expressions of Interest will be evaluated from credible and well-funded companies with experienced management and exploration teams, and preferably with experience in the Bathurst camp or other VMS camps elsewhere. A Partnership would provide low-risk access to exploration upside in a highly prospective base metal VMS mining camp, in the safe and secure mining jurisdiction of New Brunswick.

Bathurst Joint Venture Project

The Joint Venture consists of 21 claims (1441 Claim Units) covering 29,830 hectares and owned 50%:50% by ELN and GCC in the prolific Bathurst Mining Camp. The GCC 100% owned land consists of 18 claims (631 claim units) covering approximately 13,560 hectares (Figure 1). The claims collectively overlie seven zinc-lead sulphide mineralized occurrences, all of which remain open to exploration. In addition, the joint venture recently received the results of a state-of-the-art airborne gravity survey by Fugro GeoServices Ltd. and a proprietary computer-aided (CARDS) targeting program conducted by DIAGNOS Inc. The majority of the 160 CARDS Targets remain to be explored. A multi-year indicative \$8M exploration program is proposed for the exploring the mineralized occurrences for NI43-101 compliant resources and the CARDS Targets and other targets for new discoveries.

Qualified Persons Statement

This news release has been reviewed and approved for technical contents by William Stone, Ph.D., P.Geo. and a Qualified Person under the provisions of National Instrument 43-101.

About El Nino Ventures Inc.

El Nino Ventures Inc. is a base metal exploration and development company with zinc-lead properties in the Bathurst Mining Camp of New Brunswick and a copper project in Africa. In addition to the Bathurst Joint Venture Project with Glencore, ELN has a 35% interest in the Murray Brook Project, a near surface zinc-lead-copper deposit with a positive Preliminary Economic Assessment (for details see ELN's website at www.elninoventures.com). The remaining 65% interest in Murray Brook is owned by Votorantim Metals Canada Inc., Project Operator and a wholly owned subsidiary of Votorantim Metais, a privately owned company and the second largest mineral resource company in Brazil. ELN also owns 70% of the Kasala copper property in the Democratic Republic of the Congo. In May 2014, ELN entered into an option agreement with MMG Limited whereby the later can acquire the Company's 70% interest in the Kasala copper property for a total consideration of \$6M.
